

Jim Jacoby Photography Workshop

Supply list

- Appropriate clothing for the field shooting portion of the event
 - Digital camera (preferrably DSLR, but all are welcome)
 - Tripod (not required, but HIGHLY recommended)
 - Equipment such as polarizers or ND filters, multiple lenses, off-camera flash, remote trigger, etc. are all welcome and will be discussed, but are not needed to participate.
 - Optional: \$20 for course materials available at the workshop.
- Jim will be bringing copies of a digital photography guide that he developed specifically for his workshops. It will cover everything he'll be teaching and then some. It serves as a great reference guide for students after the workshop with all the techniques and concepts covered in detail for future use. It also saves having to take a lot of notes as students will have pretty much everything in booklet form already.

If you have questions, you may contact Jim directly at jim@deilight.com
